

CARLOS PHILIPS

Data Center Technician | Network & Systems Engineer | Microsoft Endpoint Administrator | Full-Stack Developer
Offenburg, Germany • carlphil9924@gmail.com • +49 176 3255 8189 • linkedin.com/in/carlosphilips66774216a/

PROFILE

Experienced IT infrastructure and systems engineer with more than 5 years of professional experience deploying and maintaining critical systems in industrial, banking, and enterprise environments. Strong knowledge of Microsoft Intune, Entra ID (Azure AD), and Microsoft 365 administration for endpoint management and identity governance. Experience with SCADA/BMS monitoring, structured cabling, UPS systems, Active Directory, and network hardware. Additional skills in full-stack web development and application security. Security-conscious professional with a proven zero-error record on mission-critical deployments. Currently pursuing an MSc in Enterprise and IT Security at Offenburg University of Applied Sciences.

PROFESSIONAL EXPERIENCE

IT Support Technician (Executive)

Marshall Oil and Gas Services — Takoradi, Ghana | May 2021 – July 2024

- Managed Microsoft Intune and Entra ID (Azure AD): device enrollment, compliance policies, conditional access, MFA enforcement, and app deployment.
- Administered the Microsoft 365 tenant: user provisioning, Exchange Online, SharePoint, Teams, OneDrive, and license management.
- Installed and maintained UPS systems to ensure uninterrupted power supply for critical infrastructure.
- Installed and configured PLC racks and I/O modules; monitored operations via SCADA with regular walk-throughs — zero incidents.
- Designed and deployed multi-site LANs: firewalls, Active Directory, group policies, and domain user management.
- Installed and aligned Ubiquiti EdgeMAX point-to-point radio links; laid fiber-optic cabling for high-speed connectivity.
- Installed and maintained IP surveillance cameras, network printers, and peripherals across all sites.
- Performed tower climbs for antenna installation, cable management, and radio equipment mounting.
- Conducted security audits and implemented data protection policies for critical network infrastructure.
- Managed the IT procurement budget: vendor selection, contract negotiation, and cost tracking for cost-efficient delivery of hardware, software, and services.
- Built and maintained relationships with external service providers and suppliers, including monitoring service delivery, SLA compliance, and on-site quality control.
- Created and maintained Standard Operating Procedures (SOPs) and IT policies for system administration, security protocols, and operational workflows.
- Created and maintained Management-of-Change (MOC) documentation for all infrastructure changes, including traceability, risk assessment, and stakeholder sign-off.
- Coordinated with external service providers and trained more than 20 staff in IT security and system operation.

IT Support Specialist / Check Processing System Technician

Clydestone — Accra, Ghana | May 2018 – April 2021

- Lead technician for the national check clearing system: installation, configuration, and maintenance of check-scanner hardware and software across more than 100 workstations in multiple banks.
- Supported GTU data center operations: system monitoring, incident management, and escalation coordination.
- Performed hardware maintenance and replacement of Field Replaceable Units (FRU) to minimize downtime.
- Automated rack provisioning and validation workflows, improving deployment efficiency.
- Handled more than 200 Tier-2/3 support tickets with a 40% reduction in average resolution time.
- Resolved network faults: IP conflicts, DNS/DHCP errors, and physical-layer issues.
- Enforced cybersecurity policies and system audits for more than 50 users.
- Trained end users in check-scanner operation, IT security, and software usage.

Full-Stack Web Developer

Belzir — Berlin, Germany | December 2024 – March 2025

- Developed a scalable multi-tenant web application with RBAC, REST API integrations, JWT authentication, and AES encryption.
- Designed an asset-tracking and management system with full documentation and performance testing.

EDUCATION

M.Sc. Enterprise and IT Security — Offenburg University of Applied Sciences, Germany • October 2025 – present
B.Sc. Information Technology — University of Ghana, Accra • Graduated 2018

CORE COMPETENCIES

Data Center & Infrastructure	UPS installation & maintenance, PLC racks, I/O modules, SCADA/BMS monitoring, structured cabling, fiber installation, rack mounting, FRU replacement
Microsoft Endpoint & Cloud Admin	Microsoft Intune (device enrollment, compliance, app deployment), Entra ID / Azure AD (conditional access, MFA, SSO, identity governance), Microsoft 365 (Exchange Online, SharePoint, Teams, OneDrive), Defender for Endpoint
Networking	TCP/IP, DNS, DHCP, LAN/WAN, VPN, firewalls, switches & routers, Ubiquiti EdgeMAX, Active Directory, group policies
Operating Systems	Linux (Ubuntu, CentOS, RHEL), Windows Server 2016/2019/2022, macOS
Security	Security audits, data protection, vulnerability scanning, SIEM, incident response, ISO 27001, NIST, OWASP, IAM, encryption
Scripting & Development	PowerShell, Bash, Python, JavaScript, PHP, React.js, Node.js, Express.js, Vue/Nuxt.js, MERN stack
Databases	MySQL, PostgreSQL, MongoDB, Redis
Cloud & Version Control	AWS, Git, GitHub, GitLab, Bitbucket
Soft Skills	Security awareness, external vendor coordination, problem-solving, technical documentation, teamwork

PROJECTS

Check-Scanner Management Web Application

Full-stack web application to track and manage check-scanner deployments across multiple banks in Ghana.

Time Tracker App (MERN Stack)

MERN-stack application with real-time tracking, role-based access control, and a reporting dashboard. Live: timetracker-rho-lyart.vercel.app

Multi-Tenant SaaS Platform

Scalable multi-tenant web application with RBAC, REST APIs, JWT authentication, AES encryption, and an integrated asset-management module (Belzir, Berlin).

Enterprise-Wide Network Deployment

Designed and deployed multi-site LAN/WAN infrastructure at Marshall Oil and Gas: firewalls, Active Directory, group policies, point-to-point radio links, and a fiber backbone — zero security incidents over 3 years.

Microsoft Intune / Entra ID Rollout

Led the endpoint-management modernization at Marshall Oil and Gas with Intune and Entra ID — device enrollment, conditional access, MFA enforcement, and full M365 tenant administration.

Menuxer — Dynamic QR Menu Platform

Built Menuxer (menuxer.com), a platform for creating and managing dynamic QR codes that lets businesses update their digital menus, prices, and promotions in real time — without reprinting physical materials. Designed for scalability and ease of use in hospitality and retail.

CERTIFICATES

- Application Security Analyst Mastery Award — IBM
- Mobile Application Development Mastery Award — IBM
